ACKNOWLEDGEMENT

Thanks to Allah SWT for His blessing and assistance, the author could finish this thesis. This thesis was made as a report of research and analysis of project critical success factors in oil and gas industry in Indonesia.

Upon completion of this thesis, the author would like to express my deepest gratitude to these following parties:

1. Firdaus Alamsjah, Ph.D, as dean of Bina Nusantara Business School and as my academic advisor and mentor, for allowing me to write this thesis and for his professional guidance and his precious time in guiding and supporting me throughout the writing of my thesis.

2. My mother, sister and brother, who gave support and lots of courage during this thesis.

3. All lectures and staff in Bina Nusantara Business School, for giving the knowledge and helping me to complete thesis.

4. Fellow students, friends, colleagues who helped me in writing the thesis.

5. All other parties who have directly or indirectly involved in this thesis.

The author also wishes that this thesis could give more knowledge for people who want to develop a success project and could be a useful reference for further research in this area.

Jakarta, January 2009

The Author
ABSTRACT

In a rapid development of industries in Indonesia, many projects were developed in Indonesia companies such as in oil and gas industry and non-oil and gas industries develop projects. Here, successful and failure project occurred.

For this reason, this research presents that it is important to use project critical success factors in developing project in many industries. This critical success factors already identify into a model, which this model proposes three criteria: clarify of goals and objectives; project organizations; project life cycle management processes. This model is proposed to achieve successful project which it means the project achieve through the objectives of budget, schedule and quality.

Keywords: Project Management, Project Critical Success Factors, Project success, Oil and Gas Industry
