Abstract

Objectives: Compare the most popular portable video games console in this era which is NDS, PSP, and iPod Touch in several aspects that has been described in the scope. The target of this project is for people who want to know the advantage and disadvantage of those consoles. So, they can consider which console they prefer to buy.

Methods: This research use survey questionnaire. There are 60 respondents. The respondents are college and elementary or junior high school student. They will be classified between age and gender criteria.

Result and Conclusion: Portable video console that mostly choose by people is PSP and iPod Touch. PSP is popular among male user and user in age range 10-23 years old. iPod touch is popular among female user and 18-23 years old user.

Key words
Portable video game console, PSP, NDS, iPod touch, touch screen, keypad, stylus, UMD.
PREFACE

This thesis “A Study On Comparison between iPod touch, PSP, and NDS” is intended to serve as the author’s final project upon the completion of her undergraduate study at BINUS UNIVERSITY INTERNATIONAL. In addition, this thesis also represents the author’s implementation of some of the knowledge gained over past four years.

First and foremost, the author would like to express her deepest gratitude and gratefulness to the Lord Almighty God, for deluging her with blessings, strength, and courage to finalize her thesis.

Furthermore, with this opportunity, the author would also like to confer her appreciation as well as acknowledgement to a number of people who have been very supportive and have kindly provided general assistance for the author. Distinctly, they are:

1. Author’s parents and family, for every support, advice and understanding until now.
2. Mr Yaya Heryadi M.Sc, Thesis Supervisor who help the writer to complete this thesis and also thank him for his trust.
3. Mr. Raymondus Kosala, Ph.D, Head of School of Computer Science of Binus University International, for all the knowledge, encouragement and support throughout the author’s study in Binus International.
4. All Computer Science lecturers, for sharing their knowledge and their guidance.
5. All Computer Science students batch 2011, for all of friendship and memorable college life over past four years.
7. All of respondents, for their support to give their opinion so the writer can process and analyze the information.
8. Everyone in my life who ever love, hurt, and paints every color in my life so I can be a better and wiser person.

I wish all of them have a good fortune and futures in life. The last but not least, the author realized that this thesis is far from perfect, thus any comments and suggestions are greatly appreciated for further improvements. Hopefully this thesis would bring benefits and provide additional information for the readers.

Jakarta, 6 June 2011
