

## ABSTRACT

This thesis concerns with the phenomena of code switching which occur among the lecturers of the English Department studying about culture, literature, and linguistics. The purposes of this thesis are to find out what types and functions more likely to occur among those lecturers, to analyze the types and functions of the lecturers' code switches, and also to find out which branch of study has the highest number of code switching. By applying Poplack's theory, this thesis finds that intersentential code switching is the type of code switching that is more likely to occur. It has the highest number of occurrence among the other two types with the total 456 times of occurrence which dominates 77% of the total occurrence of the three types. In addition, by applying Gumperz's theory, this thesis also finds out that most lecturers switch their languages to qualify or to explain on the topic which is the fourth function of the Gumperz's six discourse theory. This function dominates the occurrence with the total 102 times of occurrences and 40 % in dominance. Finally, this thesis also figures out that the branch of study which has the highest number of code switching is the branch of literature.

## ACKNOWLEDGEMENT

First of all I would like to be grateful for God's blessings and my parents' encouragement and support. This thesis is written through many supports, critics, and comments from many persons; therefore, I would also like to thank Mr. Daru, my mentor, for his knowledge, time, and advice. I am very grateful for his support and guidance which contribute a lot to the improvement of my thesis.

Second, I would like to thank the faculty of English Department at Bina Nusantara University, especially to Mrs. Wiwik, Head of English Department, for her remarks and assent to my observation appeal. In addition, this thesis would also not be possible to be completed without the support of all teachers and students involved during the observation. I am particularly grateful to Ma'am Dewi, Ms. Novenia, Mr. Ichwan, Ma'am Tjoo, Mr. Hendro, Mr. Anddy Steven, Ma'am Endang, and Ma'am Ruth for their thoughtfulness and enthusiasm to share their experience and view.

Finally, I would also acknowledge the support of my fellow students and friends at Bina Nusantara University and University of Technology Sidney who have been very supportive and caring enough through the making of this thesis. Especially to Dimitri, Bong, Mariana, and Melissa, I could not have made it without your support.
