

ABSTRACT

The aim of this paper is to examine the types of intra-sentential code mixing, the functions of code mixing, and the most dominant type and function that are used in magazine especially in *Good Housekeeping's* magazine. The research is divided into three parts. The first method is, the writer collects the articles which there are the occurrence of code mixing in magazine based on the types of intra-sentential code mixing. Second, to find out some functions of code-mixing that are used in the articles of *Good Housekeeping's* magazine, the writer uses some theories to find the problem formulation. There are 7 functions of code mixing and the writer spells out each function of code mixing in articles. The last the writer draws the result into a diagram to show which type and function that are mostly used in the articles. The result of the data is found that Alternation is mostly found in the articles because this type is more easily used in written. Lexical borrowings is mostly function used in articles when people are due to lack of equivalent lexicon in Indonesian language.

Keywords: code-mixing, intra-sentential, types, functions.
