ABSTRACT

This paper discusses about a girl who becomes a victim of school bullying. The bullying starts from fourth grade until the end of high school. The writer wants to know the characterization, id, ego, super ego, and the ego defence mechanism of the main character. The research method that the writer uses is a qualitative method. First of all, the writer collected some information about the story and the related theory. After the writer found the information, the writer started to analyze it by using characterization and psychoanalysis theory. In finding the data, the writer went to library of Bina Nusantara, University of Indonesia, and Atma Jaya. The writer found the result of this paper that when someone did not want to face the reality, he or she could use ego defence mechanism, of which function is to reduce anxiety. (RRACP)
