ABSTRACT

The purposes of this study are to find out the errors which students do when combining the sentences by using adjective clause. Through the analysis we can know what the source of the errors are and that usually occurs errors. The main data of this research are using questionnaires which have already been answered by students. The data analyzed using theories related with adjective clause. The result shows that mostly students already mastered and understood about adjective clause. As the conclusion, this thesis reveals that 79% of students have correct answers.
