

ABSTRACT

This research presents a discussion of online grammar exercises to show whether the materials can motivate teachers to use technology in teaching grammar and to prove that the materials can encourage students to study grammar harder. By giving tests and questionnaires, the analysis focuses on finding out both advantages and disadvantages of online grammar exercises, and also appropriate methods and tools for teaching and learning grammar. The analysis show that there are many the advantages, some the disadvantages, and the appropriate methods and tools for teaching and learning grammar based on 30 students, 4th semester, English Department, BINUS University. The proofs can be seen from their improvements on scores and their comments of some questions. The findings show that online grammar exercises are convenient to be used in grammar teaching and learning process.
