**THESIS TITLE ANALYZING THE INFLUENCES OF FINANCIAL
PERFORMANCE TO THE STOCK RETURN IN MINING INDUSTRY**

Marilyn Chandra 0800778935

Abstract

Objectives The objective of this research is to find the influence of financial performance which is measured by financial ratio to the stock return in mining industry 2003-2007 periods. Independent variables in this research are four financial ratios PER, DER, ROE, and NPM. Dependent variable is the stock return which is collected quarterly.

Method The research samples which are used in this research are the company who has been running in mining industry and has been registered in the Jakarta Stock Exchange since 2003. Hypotheses testing are conducted by time series used multiple linier regression tested and correlation tested.

Results The result of testing show that financial ratios (PER, DER, ROE, and NPM) has no significant influences to the stock return.

Conclusion After doing the analysis and testing, the writer finds that there is no significant influence to the stock return. Thus, the investor who liked to invest in mining company should find out more about the external factors that can affect the stock return of the company.

Key words

Financial performance, financial ratio, stock return, multiple regression method

PREFACE

This thesis with a title: **Analyzing the Influences of Financial Performance to the Stock Return in Mining Industry**, was selected and prepared to fulfill the final requirement for a completion of undergraduate degree on Accounting major, School of Accounting, Bina Nusantara International University.

First and foremost, the author would like to express her ultimate gratefulness to the Lord for innumerable blessings that He has given. None of the author's accomplishments and the fulfillment of this thesis would be possible without His grace and guidance.

In this opportunity, the author would like to thank a number of people for providing assistance and support in helping the author to complete this thesis:

1. Mr Firdaus Alamsjah, as the Executive Director of the Joseph Wibowo Center.
2. Mr. Iman Heru Wijayanto, as her supervisor, for the great supervisor, support, patience, understanding, and valuable time he provided writer while writing her thesis.
3. Mr. Dezie Leonarda Warganegara, as our teacher, for his encourage, motivation, and knowledge he provided during study period.
4. Mr. Marko S. Hermawan, as a program head of undergraduate school of accounting and finance, for his kindly assistance and support through all these years.

5. Mr. Dr. Stephanus Remond Waworuntu, as Head of Accounting and Finance School.
6. Mr. Kamen Chandra, Mrs. Mellissa and writer's sister as her wonderful family for remarkable support, motivation, patience, and love to make all possible in the completion of her thesis.
7. Dimas Ibnu Hartono, for his amazing support, patience, understanding, and love given to writer. Without him, writer could not go through this. Thanks for always being there listening of her complains and able to cheer her up.
8. Writer's best friends, Albert, Daniel, Lidya and Pratiwi for their splendid friendship. Thanks for all unforgettable moments that we shared together.
9. Everyone who have supported writer for the thesis completion.

Writer believes that without the involvement and support of every party stated above, writer would not be able to finish the undergraduate degree at Bina Nusantara International. Lastly, writer expects for this thesis to provide benefit to other students, and others who need it.

Jakarta, 14 July 2008

Writer,

Marilyn Chandra
