Indonesia is a big nation in ASEAN region, however the development of capital market in Indonesia is still lacking behind from other ASEAN nation. Mutual Fund as one of the capital market product was once become investment favorite, until the sudden rush from investor that make significant decrease in Net Asset Value in all mutual fund product, that leads to the downturn in mutual fund trends.

Reksadanaku.com is a website for mutual fund investor in Indonesia. The purpose of this website is to help government in developing Mutual Fund in Indonesia. By implementing the website, it will help the government in promoting mutual funds for prospect investor and giving education and assistance to the mutual fund investor.

The process of creating this website will start from problem identification, and user requirement analysis, and subsequently design a website that fits with the user requirements. The current problems and the user requirement will be identified based on the survey findings.
